

VASSILIS CUTSURIDIS received a B.Sc. and an M.Sc. degrees in physics and mathematics, an M.A. in Cognitive and Neural Systems and a Ph.D in Computational Neuroscience. He completed a post-doctoral research fellowship in the Department of Computing Science and Mathematics at the University of Stirling (Scotland), where he investigated the roles of theta phased inhibition in the encoding and retrieval of memory patterns in the hippocampus. He was a visiting scholar in the Center for Memory and the Brain at Boston University, and a lecturer at King's College London. Currently he works as a researcher at FORTH in Crete (Greece). He has published over 50 peer reviewed papers and edited three books. He serves on the editorial boards of several journals including *Frontiers in Systems Neuroscience*, *Frontiers in Cognitive Science*, *Cognitive Computation*, *Scholarpedia*, *The Scientific World Journal*. He is the series editor of the "Springer Series in Cognitive and Neural Systems" and the "Springer Trends in the Augmentation of Human Performance".
